

28.08.2017

The Central Library, DTU has been subscribing a number of electronic resources for teaching and research. It has been observed from the usage statistics that these databases are not being used optimally. The reason could be non awareness or lack of understanding of various database platforms or any other.

In order to overcome these shortcomings the Central Library is going to organize a five days workshop titled "**E-Resources: A Gateway for Research, 2<sup>nd</sup> edition (2017)**" from **4<sup>th</sup> September 2017 to 8<sup>th</sup> September 2017** between **11:00 am to 5:00 pm** During the workshop experts of databases being subscribed by the DTU will give their presentations explaining how to search and make effective use of these databases for research.

Certificates will be issued to the participants

Working lunch will also be served during the workshop

All members and students of DTU are invited to attend the Workshop. To register yourself kindly use the following link please:-
